

HOME ELECTRONICS

Wiring Today's Homes For Tomorrow

By Brian C. Schmidt
President

Advanced Installations, Inc. Founded in 1996, we have built a reputation of quality custom installations, and customer satisfaction. Advanced Installations employs only the best system integrators. We strive for complete customer satisfaction and except nothing less.

Advanced Installations, is a complete full service integrator. We will design, install, program, and provide full training and support of all low voltage systems in your home. We can integrate lights, thermostats, gates, cameras, telephones, and much more in a simple, easy to use control system.

Occasionally, our services are called for out of state, and we have completed projects in Maui, West Palm Beach, and Myrtle Beach. These customers can completely control their homes including the lighting and temperature, from anywhere in the world via the internet.

Your home is unique and reflects your taste and style. The purpose of our systems is to accent your home's personality while enhancing your lifestyle. All of our installations are custom and-tailored to your needs. Please call us for a convenient, no obligation visit and start thinking of what we can do for you.

BE SAFE

Have Piece of Mind

Today's world is a very complicated place. Make sure you take the steps to safeguard your home and your family. We can design systems that will let you preview all visitors on a screen of TV. Use the lighting controls to give an "at Home" impression. Have the security system contact police and fire when need. Use the automation to alert you via e-mail when something is amiss. View your home on cameras from anywhere in the world. Record those cameras in case of an issue, with digital backup to hard disk.

SOLUTIONS

At the Office

Advanced installations has solutions for you to monitor offices, shopping centers, warehouse and industrial sites. Some of the benefits our commercial clients have seen from remote camera monitoring are; knowing that

your centers have been plowed, that the dumpsters are emptied every time you pay them to be emptied, and that you're not being taken advantage of by illegal dumping.

MOVIES

Without Leaving Home

Simply put, Home Theater is a high quality audio and video entertainment environment that re-creates the movie experience in your own home. A home theater can be as simple or elaborate as you wish, from a specially designed and equipped "theater" to an ordinary den or living room.

ULTIMATE

In Control

Home Automation is the technology that allows all electronic devices in the home to seamlessly communicate with each other and the outside world. All aspects of the automated home-lighting, entertainment, security, com-

munications, will be tied to each other and to the internet. With a touch of a single button, you can communicate with any connected device in the home. For example, think of lighting the way you do air conditioning. It's inefficient to have a window unit in each and every room when a central system can do the job better. The same is true with lighting-preset your needs and save time and energy cost.

SIMPLIFY

Your Life and Your Music

Music is truly the finishing touch for your home. Come home, relax and call up some of your favorite music in one room, while your family listens to something different in other rooms. Today's integrated systems can provide you with simple, one touch operation with multiple central music servers.

EXPERT INSTALLATION

To enjoy the pleasure of custom installation, you need quality equipment and a well-designed, professional installation. The experts at our company know what's new and what's best, and we have the technical expertise to design the best system for your budget.

We are members of the Custom Electronic Design & Installation Association (CEDIA), the only global organization of experienced custom designers and installers. We are licensed, insured professionals who work directly with homeowners, or with their architects, builders, and interior designers.

Call us. We are at your service.
